

**First** in Quality. Built to **Last**.

## EX-CF

### CASE FORMER

#### CASE FORMING MADE EASY

The EX-CF Case Former from Eastey is designed for semi-automatic case forming and packing. The durable design has proven to keep production and maintenance efforts to a minimum to improve your case packing process. The EX-CF Case Former provides a fast and cost-efficient alternative to manual case forming.

#### EASY OPERATION

The EX-CF Case Former enables a single operator to form, pack, and seal corrugate cases. Operation is simple: open the case and place it in the top of the case former. Pneumatic switches activate the machine's flap folding mechanism to fold the bottom major and minor flaps. Once the flaps are folded, the case will stay in place while the case is filled by the operator. Filled cases can then be advanced into a taper for automated top and bottom case-sealing.

#### INCREASED PRODUCTIVITY

EX-CF Case Former offers fast and easy case size changes with adjustable hand-crank side rails to accommodate boxes 8" to 25.5" in length, 6" to 19" wide, and 3.5" tall and greater.

## COMPACT CASE FORMING AND PACKAGING

Designed for semi-automatic case forming and packing, the EX-CF will improve productivity and increase your ROI

#### INDUSTRIAL QUALITY

Each EX-CF machine is made from sturdy 12 gauge steel, high quality construction, and a powder coated exterior to protect the machine from abusive conditions for guaranteed years of use. The EX-CF will be a workhorse in your industrial case packing operation.

#### INCREASE YOUR ROI

The use of Eastey's EX-CF case forming machine can be learned in minutes, avoiding breaks in production and downtime. For increased efficiency, EX-CF Case Former can be combined with any Eastey Case Taper for automated case sealing.

#### THE RIGHT SOLUTION

Rugged design. Proven reliability. Simple operation. Your benefits go on and on. When it comes to industrial operation, rely on Eastey to provide the right solution for your case sealing needs.

1. Stainless steel wear surfaces
2. Easy case size changes with adjustable folding/revolving crank handle
3. Air only operation with emergency stop
4. Adjustable foot extensions for level setup, or optional caster for movement within your plant
